## Assessing Skills that Predict Independence and Readiness for Employment for Adults with Down Syndrome

Researchers at Drexel University are conducting a study to understand more about cognitive and behavioral factors that are associated with vocational outcomes and independent living skills among young adults with Down syndrome.

### Who can participate?

To participate, you must be the family member of an adult with Down syndrome (who is between the ages of 18 and 39 years).

### Where does the study take place?

All activities are completed online.

### What can I expect to happen in this study?

You will be asked to answer questions about your family member's behavior, daytime activities, and your family's background. You will be compensated for your time with a gift card.

### How long am I part of the study?

Participation takes approximately 1.5 hours.

### I want to learn more. Who do I contact for more information?

If you want to determine if you are eligible to participate and begin to complete study procedures, select the [Study Link](#) or scan the QR code below

If you have questions or want to contact the study Principal Investigators, Dr. Nancy Raitano Lee and Dr. Gregory Wallace, please contact the study via email ([ladder\\_lab@drexel.edu](mailto:ladder_lab@drexel.edu)) or phone (215.553.7164).
